PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, user-focused web interfaces using React JS, JavaScript (ES6), and modern CSS frameworks like TailwindCSS and Bootstrap. Strong foundation in HTML5, CSS3, and component-based development, with a collaborative mindset and a track record of delivering clean, functional front-end solutions in fast-paced environments.

TECHNICAL SKILLS

Languages & Markup: HTML5, CSS3, JavaScript

Frameworks & Libraries: React JS, Bootstrap, Tailwind CSS, GSAP

Tools: Visual Studio Code, Git, GitHub, Notepad++, Sublime Text

Core Strengths: Website Maintenance, Responsive Web Design, Adaptability, Time Management, Team Collaboration

WORK EXPERIENCE

Web Developer — TechnStack

June 2024 – July 2024

- Developed and maintained responsive websites using HTML5, CSS3, Tailwind CSS, and React JS, ensuring consistent display across desktop and mobile screens.
- Built dynamic web pages and interactive forms with JavaScript and React JS to improve front-end user experience.
- Collaborated with the development team using Visual Studio Code and Git for efficient code writing, debugging, and version control.
- Delivered a final capstone project demonstrating end-to-end front-end development capability, from UI design to functional implementation.

PROJECTS

GitHub Profile Finder | *githubexplorer-black.vercel.app*

Tech Stack: React JS, JavaScript (ES6+), GitHub REST API, Tailwind CSS, Vercel

- Built a responsive web app that lets users search any GitHub username and instantly view the profile avatar, bio, followers, following and public repositories.
- Integrated the GitHub REST API with async/await and handled loading, empty and “user not found” states for a smooth user experience.
- Designed a clean, mobile-first interface and deployed it live on Vercel.

ZeroStore – E-commerce Web App | *zerostore-ten.vercel.app*

Tech Stack: React JS, JavaScript (ES6+), Tailwind CSS, React Hooks, Vercel

- Developed a responsive e-commerce storefront with product listing, product details and a shopping cart experience.
- Built reusable React components and managed cart and product state with React Hooks for clean, maintainable code.
- Ensured a consistent shopping layout across mobile, tablet and desktop screens, and deployed the app live on Vercel.

Blogify – Blogging Platform | *blogify-pied-nu.vercel.app*

Tech Stack: React JS, JavaScript (ES6+), Tailwind CSS, React Hooks, Vercel

- Created a responsive blogging web app where users can browse, read and explore blog posts in a clean, reader-friendly layout.
- Structured the UI into reusable React components with dynamic rendering of post content using React Hooks.
- Applied Tailwind CSS for a modern, mobile-first design and deployed the project live on Vercel.

EDUCATION

BBA – Technology Management

The Islamia University of Bahawalpur | 2022 – 2026 (Expected)

FSc – Pre-Engineering

Superior Group of Colleges, Bahawalpur | 2021 – 2022
